## PRACTICAL RECORDING COURSE:

Learn about different microphones and how to set them up for a recording. Connect and patch instruments /mics and route them through various equipment from audio interfaces plus digital and analogue mixing consoles and outboard equipment. Understand gain staging techniques throughout the recording process.

Learn the ins and outs of industry standard DAW software AVID Pro Tools.

## LEARN TO MIX & MASTER AUDIO:

Gain skills in how to edit and manipulate audio and mix various sound sources in the recording studio digital audio workstation (DAW) and in the lab DAW's. Learn will learn to use processing and effect techniques including equalisation (EQ), compression, reverb, delay and more in order to finalize and balance the mix.

Obtain a sound knowledge of the fundamental differences between mixing and mastering audio.

## UNDERTAKE LIVE AUDIO OPERATIONS:

Position and set up equipment for operation according to production requirements. Communicate technical information to performers and presenters. Test and confirm equipment is working, and make adjustments as required. Produce required technical level and tonal balances using a console. Maintain overall audio level in line with requirements of environment.
